# THE CHRONICLE

DUKE UNIVERSITY,

Durham, NC

May 1983

May 1984

Compiled by *Herald-Sun Library*  
Durham, NC

The Chronicle Index is a guide to articles and photographs in the Duke University students' newspaper, *The Chronicle*.

It is published in this annual cumulated volume by the *Herald-Sun* Newspaper Library.

### SCOPE OF INDEX

All the items concerning events, people and places at Duke University are included in The Chronicle Index. State, national or international news is included only when it specifically features Duke University or a person from the University.

Editorials, letters-to-the-editor, obituaries and any local Duke University by-lined articles are included regardless of subject. Generally not included are syndicated columns, wire service features and local display ads.

### INDEXING DEPTH

Names of individuals are indexed when quoted heavily, the subject of a news story or feature, or noteworthy for some reason. Multiple subject headings are assigned to each item based on important names, words or concepts that appear in the article or are implied by it. Whenever possible, subject headings are specific rather than general (e.g. "rice diet" not "diets").

When necessary, sub-headings are used to make broad headings more specific (e.g. "Associated Students of Duke University, elections", or "Duke University, fires".) Cross references are used to guide the

user to the appropriate headings. See references point from invalid headings to correct ones. See also references indicate related headings.

### ORGANIZATION

The Chronicle Index is divided into two sections: subject headings and names of people. The name index is an alphabetical listing of people prominently mentioned in the news. The subject index is an alphabetical listing of specific titles, words, or concepts used in news articles or features.

For filing purposes acronyms and initialisms precede words or phrases. Within word groups commas precede characters (e.g. "Duke University, dining halls" precede "Duke University Food Services".) In general, numerals precede letters (e.g. "Duke university Medical Center, 50th anniversary" precedes "Duke University Medical Center, accreditation". Hyphens are regarded as spaces and apostrophes are ignored.

Following a name or subject heading is a list of articles pertaining to that name or subject. For each a headline is provided along with symbols identifying the name of the newspaper, edition, date, section, page, type of item, reporter by-line and type of illustration. Explanations of the symbols appear on the following page.

# THE CHRONICLE

DUKE UNIVERSITY

Durham, NC

May 1984  
May 1985

Compiled by *Herald-Sun Library*  
Durham, NC

The May 10, 1984 CHRONICLE was inadvertently omitted from this index. See appendix for this information.

The Chronicle Index is a guide to articles and photographs in the Duke University students' newspaper, *The Chronicle*.

It is published in this annual cumulated volume by the *Herald-Sun* Newspaper Library.

### SCOPE OF INDEX

All the items concerning events, people and places at Duke University are included in The Chronicle Index. State, national or international news is included only when it specifically features Duke University or a person from the University.

Editorials, letters-to-the-editor, obituaries and any local Duke University by-lined articles are included regardless of subject. Generally not included are syndicated columns, wire service features and local display ads.

### INDEXING DEPTH

Names of individuals are indexed when quoted heavily, the subject of a news story or feature, or noteworthy for some reason. Multiple subject headings are assigned to each item based on important names, words or concepts that appear in the article or are implied by it. Whenever possible, subject headings are specific rather than general (e.g. "rice diet" not "diets").

When necessary, sub-headings are used to make broad headings more specific (e.g. "Associated Students of Duke University, elections", or "Duke University, fires".) Cross references are used to guide the

user to the appropriate headings. See references point from invalid headings to correct ones. See also references indicate related headings.

### ORGANIZATION

The Chronicle Index is divided into two sections: subject headings and names of people. The name index is an alphabetical listing of people prominently mentioned in the news. The subject index is an alphabetical listing of specific titles, words, or concepts used in news articles or features.

For filing purposes acronyms and initialisms precede words or phrases. Within word groups commas precede characters (e.g. "Duke University, dining halls" precede "Duke University Food Services".) In general, numerals precede letters (e.g. "Duke university Medical Center, 50th anniversary" precedes "Duke University Medical Center, accreditation". Hyphens are regarded as spaces and apostrophes are ignored.

Following a name or subject heading is a list of articles pertaining to that name or subject. For each a headline is provided along with symbols identifying the name of the newspaper, edition, date, section, page, type of item, reporter by-line and type of illustration. Explanations of the symbols appear on the following page.

# THE CHRONICLE

DUKE UNIVERSITY

Durham, NC

May 1985

May 1986

Compiled by *Herald-Sun Library*  
Durham, NC

The Chronicle Index is a guide to articles and photographs in the Duke University students' newspaper, *The Chronicle*.

It is published in this annual cumulated volume by the *Herald-Sun* Newspaper Library.

### SCOPE OF INDEX

All the items concerning events, people and places at Duke University are included in The Chronicle Index. State, national or international news is included only when it specifically features Duke University or a person from the University.

Editorials, letters-to-the-editor, obituaries and any local Duke University by-lined articles are included regardless of subject. Generally not included are syndicated columns, wire service features and local display ads.

### INDEXING DEPTH

Names of individuals are indexed when quoted heavily, the subject of a news story or feature, or noteworthy for some reason. Multiple subject headings are assigned to each item based on important names, words or concepts that appear in the article or are implied by it. Whenever possible, subject headings are specific rather than general (e.g. "rice diet" not "diets").

When necessary, sub-headings are used to make broad headings more specific (e.g. "Associated Students of Duke University, elections", or "Duke University, fires".) Cross references are used to guide the

user to the appropriate headings. See references point from invalid headings to correct ones. See also references indicate related headings.

### ORGANIZATION

The Chronicle Index is divided into two sections: subject headings and names of people. The name index is an alphabetical listing of people prominently mentioned in the news. The subject index is an alphabetical listing of specific titles, words, or concepts used in news articles or features.

For filing purposes acronyms and initialisms precede words or phrases. Within word groups commas precede characters (e.g. "Duke University, dining halls" precede "Duke University Food Services".) In general, numerals precede letters (e.g. "Duke university Medical Center, 50th anniversary" precedes "Duke University Medical Center, accreditation". Hyphens are regarded as spaces and apostrophes are ignored.

Following a name or subject heading is a list of articles pertaining to that name or subject. For each a headline is provided along with symbols identifying the name of the newspaper, edition, date, section, page, type of item, reporter by-line and type of illustration. Explanations of the symbols appear on the following page.
